PROSPEX COLLECTION

Life is the ultimate adventure.

For those who love living life on the edge, we present the Seiko Prospex Collection. Serving the insatiable adventurer determined to chase down life's every thrill — in the air, over land or under the sea — Prospex is committed to marking each moment with unflagging quality and precision. Standard issue for the fearless risk taker, Prospex is specialty gear that stands up to the rugged outdoors, unflinching, just like them. Travel wise and ready for the dare, the Prospex thrill seeker recognizes the value of once-in-a-lifetime experiences and demands a trusted timepiece to help them measure and register the rush. They rely on the finest equipment for every trek, and their life may very well depend on it, right down to their rugged and stylish watch. The Seiko Prospex.

Seiko is an official partner of PADI.

PADI is the world's leading scuba diver training operation. With more than 6,300 **PADI** Dive Centers and Resorts, and more than 136,000 individual **PADI** Professionals who have issued more than 25 million certifications around the world, there are **PADI** diver courses and scuba diving services nearly everywhere.

Seiko is an official watch partner of **PADI**. To celebrate and promote this partnership, Seiko has created special **PADI** diver's watches with the **PADI** logo on the dial and with the red and blue **PADI** colors on the case.

MADE IN JAPAN

4R35-01N2 R 2

PRESAGE

COLLECTION

Fine mechanical watchmaking, from Japan.

At the heart of every Presage watch are the benefits of over a century of watchmaking. Each bold and refined with its own color scheme, the mesmerizing sunray dials all having a deep, pressed pattern whose shimmering beauty is enhanced by seven layers of gloss finish and the clarity of the box-shaped crystal. The hands are delicately curved by skilled craftsmen and women to give the watch case a slimmer profile. When turning the uniquely shaped crown, you can feel the strong torque of the winding mechanism. Featuring Seiko proprietary Trimatic technology, Presage brings together several important advances in mechanical watchmaking, including the Magic Lever, the unique and highly durable Spron alloys used in the springs and the Diashock protection system. Presage is fine mechanical watchmaking, from Japan.

COUTURA

COLLECTION

Precision. Performance.

Seiko has crafted Coutura timepieces to be as technically advanced as their bearers are rogue and rugged, smart, sophisticated, and driven to succeed. Celebrating its 15th anniversary of innovation and style, Coutura artfully blends contemporary design, Radio-Sync solar mechanics and a host of proprietary Seiko technologies. It's a seamless fusion of design, precision and innovation for men who refuse to be less than their best.

The Power of Light

Life derives its energy from light, the power to endure and perform. Such is the engine that drives the movement of our elegant new Diamonds collection, where light is harnessed and amplified by their reflection and clarity. Diamonds also enhance the design of these beautifully crafted watches, adorning anyone's look — at work, at play, at life.

SEIKO TECHNOLOGY

RADIO SYNC SOLAR

Radio Sync Solar Chronograph automatically receives radio signals daily of an official standard frequency from USA (Fort Collins), Japan, China, or Germany to precisely adjust the time and calendar.

SEIKO KINETIC

Seiko Kinetic is the first and only quartz watch powered by human energy. Based on revolutionary technology, Seiko Kinetic watches run entirely on self-generated energy from the natural movement of your wrist. Environmentally friendly. The most advanced electronic watch technology. Six-month power reserve.

SEIKO SOLAR

Seiko Solar watches collect energy from any light source and convert it into electrical energy. This energy is stored in a rechargeable lithium ion cell which takes the place of a conventional watch battery. From there, the watch operates like any other quartz watch.

CONVERSION SCALES

DISTANCE: Nautical Miles ↔ Statute Miles ↔ Kilometers

FUEL VOLUME CONVERSION:

US gallons ↔ Imperial gallons ↔ Liters

WEIGHT CONVERSION: Pounds ↔ Kilograms

ALARM CHRONOGRAPH

Seiko alarm chronographs offer the features of a chronograph along with a 12-hour alarm.

CHRONOGRAPH

Seiko chronographs provide standard watch functions as well as precise stopwatch timing for a variety of activities.

PERPETUAL CALENDAR

The Seiko Perpetual Calendar automatically adjusts for odd and even months including February of leap years.

AUTOMATIC

Self-winding mechanical watches operate using power obtained from a mainspring which is wound automatically with the motion of the wearer's arm.

FUEL VOLUME-TO-WEIGHT CONVERSION:

Fuel pounds ↔ US gallons ↔ Imperial gallons

Oil pounds ↔ US gallons ↔ Imperial gallons

Seiko bracelets are designed to be elegant and durable, as well as easy to adjust.

PRO TIPS

- Before "sizing," estimate the number of links you'll want to remove, and remove sections, rather than individual links, when you can.
- If you are only making a small adjustment, check to see if it can be made by adjusting the clasp mechanism before you start removing links.
- Save the removed links.
- Work on a flat surface so the links stay aligned.
- On expansion bracelets, remove links from near the center of the watchband.
- On clasp bracelets, remove an equal number of links from the bracelet on each side of the clasp.

LOCKING TAB BRACELETS

1. Many bracelets, particularly expansion bracelets in a "topshell and bottom box" design, are locked together by bent tabs of metal. To size these bracelets:
2. Place the band upside down and use a thin blade to pull out and straighten the tab on one end of a topshell.
- 2a. Lift the band, pivot the end of the topshell with the straightened tab away from the band and "unhook" the other hand to free the topshell. Put this topshell aside for reassembly. Repeat this procedure, on the topshell at the other end of the section you want to remove.

3. Place the band rightside up so you can see the "top boxes" you have exposed by removing topshells. Next, use a thin blade to pull out and straighten the flaps on the bottom boxes diagonally to the left of the topshells you have removed.

- 3a. Then straighten the flaps on the exposed top boxes.
4. Keeping the bracelet on a flat surface, slide the left hand section of the bracelet away from you as you pull the right hand section toward you.

5. Remove the unwanted section and align the two parts of the band for reassembly. "Staple A," the small hook on the left hand section, should slide into the top box on the right hand section above the spring. "Staple B," on the right hand section should slide into the bottom box on the available left hand section.

6. Gently "close" the flaps on the top and bottom boxes. Do not use pliers – they can damage a bracelet.
7. Take the first topshell you removed and hook its unbent end into the bracelet over the top box flap. Pivot it into place.
- 7a. Rebend and insert the tab to lock the topshell into position.

SCREW PIN BRACELETS

These bracelets are easy to size. Unscrew the pins that hold the links you wish to remove, remove those links, reassemble the band, and re-insert a screw to hold it together. Note that in some bracelets, not all links have accessible screws.

SPRING CLIP BRACELETS

These bracelets can be quickly sized, once you know how. Looking at the underside of the bracelet, place a pointed object into a spring clip you want to remove and slide the spring clip in the direction of the arrow. Once you have removed the appropriate number of links, align the remaining parts of the bracelet and put one of the spring clips you removed back in to join the bracelet back together.

SPLIT PIN TYPE (SIZING CODE I)

Push the pin in with the SEIKO Multiple Band Sizing tool or a common band sizing tool in the direction of the arrow and the pin will be removed from the link.

After removing the appropriate number of links, reassemble the links and insert the pin using the sizing tool in the opposite direction of the arrow.

PIN AND SPLIT PIPE TYPE (SIZING CODE C)

Push the pin in with the sizing tool in the direction of the arrow and the pin and a pipe can be taken out. Remove the appropriate number of links.

REASSEMBLY

Type A

Reassemble the links, place the pipe into the hole of the link and insert the pin in the opposite direction of the arrow.

Type B

Place the pipe into the hole of the link, reassemble the links and insert the pin in the direction of the arrow.

Type C

Place the pipe into the hole of the link, reassemble the links and insert the pin.

Seiko has introduced a bracelet sizing coding system, adding a sizing code on each bracelet after the Band # with a dot in-between as shown below. The bracelet code can be found on the back of the bracelet either on the end piece, clasp, or on the links.

114BA · A
Band No. Bracelet sizing code

See Operational Guide for detailed instructions on bracelet sizing codes.
